FLEXSIM

SOFTWARE AND APPLICATION DEVELOPMENT TRAINING COURSE

FLEXSIM

Dear Students：
Welcome to sign up for Flexsim training course (Courses Taught in English).
FlexSim is a powerful and versatile simulation software used across various
industries to model, analyze, and optimize complex processes and systems.
FlexSim allows users to visualize and simulate real-world scenarios, making it
an invaluable tool for improving efficiency, reducing costs, and making informed
decisions. Whether in manufacturing, healthcare, logistics, or other fields.

This course provides the foundation you need to start using FlexSim effectively.
No prior programming experience or knowledge of Flexsim is assumed. Join us
and embark on a journey to transform data into actionable insights and make
informed decisions through simulation modeling.

Course : FlexSim
Location : R2624

Course time :
09/23(Tue) 18:30~ 21:20
09/30(Tue) 18:30~ 21:20
10/07(Tue) 18:30~ 21:20
10/14(Tue) 18:30~ 21:20

※Online registration※   Limited seats, apply now!
